SEDR STUDY REVIEW COMMENT TEXT	DONE	TN7221	26-Dec-2007
STORM DRAINAGE STUDY The revised Macro & Micro Storm Drainage Studies dated Dec 13, 2007 have been reviewed for general compliance. One copy has been retained for City's records. The Storm Drainage Study is valid for one year from the reviewed date. As stated in the studies that any future development phases will revisit stormwater management and will be provided additional detention if required. Also, any future development, after being finalized with the final development plan, is required to submit the Micro Study along with the building plan for review and acceptance.
